

## PERSISTENT HOBO IS SHOT IN LEG

Mrs. Bowler Has an Exciting Experience  
At Hawthorne.

Mrs. Bowler, the wife of the Hon. Patsy Bowler, the well known attorney, had an experience at Hawthorne Saturday night that not only proved her courage, but provoked an incident that she will remember as long as she lives. Her husband was in Tonopah on one of his professional visits at the time and she was at home alone with her half-grown children.

At about 11 o'clock she heard a noise in the garden and thinking it was an animal she turned the dog loose. Immediately a man's form loomed up and he proceeded to burn the air with cuss words. She screamed which brought a number of neighbors, among them Deputy Sheriff Rosenthal. They made a hunt for the man, but could not find him, he having beat a retreat. Mrs. Bowler was considerably frightened, and when the neighbors departed, Mr. Rosenthal left her his gun with which to protect herself, not thinking, however, that the man would again return. Two hours later, though, he was back again and began breaking the fence and everything in sight. This time Mrs. Bowler did not give way to her emotions, but seizing the pistol she opened the window and took a shot at the man. The noise of the shooting again brought the neighbors, and they proceeded to hunt for the hobo and after some little search, found him doubled up in an empty wagon near the depot with a bullet hole through his right leg just above the knee. He was taken to jail, where his wound, which was not serious, was attended to and he was recognized as a man who had been working on the pipe line. He said he had no recollection of the occurrence; that the last he remembered was fighting with a man in one of the saloons.

The excitement of the affair caused the friends of Mrs. Bowler considerable uneasiness, as the lady has been ill for some time past with heart trouble, but she braved it through without any serious consequences following. Mr. Bowler was notified by telegraph of the affair, and Monday he left for his home.

### NEW COMPANY.

Organized to Operate Properties  
South of Silver Peak.

The Oro Blanco and Silver Peak Mining company is the name of a mining company that has just been organized by local men for the purpose of selling stock and working ground in the Lida district, sixteen south of Silver Peak.

The incorporators are J. S. Stotler, C. J. Blumenthal, C. H. White, E. A. and Frank Montgomery, W. J. Beauchamp and C. H. Elliott. The officers are Arthur F. White, president, and Hugh H. Brown, secretary and treasurer. The capitalization is for \$1,000,000, divided into 1,000,000 shares. Of the amount a large block will be put into the treasury and sold for development purposes.

The company owns twelve claims, all making a good surface showing, and through each of them runs one or more ledges. The deepest working is a shaft seventy-one feet deep, and from this some very high grade ore has been extracted. On all of the claims the location work has been done on ledges, and assays from these go as high as \$417 in gold and silver. Some of the ore brought to town from the property is on exhibition at C. J. Blumenthal's, and it bears a strong resemblance to that of the Montana-Tonopah and North Star. The formation of the district is porphyritic and said by experts to be similar to Tonopah's. Wood and water abound in plenty within a short distance of the district, and all the necessities for successful mining and milling are close at hand.

### IS BACK TO TONOPAH.

W. B. Pittman Tells of the Prosperity in the East.

W. B. Pittman has just returned from a three months' visit to his old southern home in Louisiana. He brought his brother, Vail Pittman,

with him, who will probably remain on a visit of thirty or sixty days before returning to the sunny south.

Mr. Pittman states that the middle west and south are very prosperous, all the mortgages on the farms and houses being paid off. He attributes the almost phenomenal prosperity to the abundant crops and high prices for cotton, corn, wheat, etc. Money is plentiful and can be readily had on good security at 3 and 4 per cent. He says he sold quite a bunch of Tonopah stock in Kansas City, and could have sold several thousand dollars' worth had it not been for the San Francisco and Tonopah stock exchange, which has done nothing but bear Tonopah stocks until they are not marketable at any price. The quotations of the exchange are received daily by all the mining men in the east and middle west, making it impossible to sell them any stock at the treasury price when the exchange price is governed by the few hundred shares in circulation in San Francisco. Furthermore, the action of the exchange in giving wildcats a fictitious and unwarranted value has had a deleterious effect and has sacrificed the value of meritorious stocks.

Mr. Pittman expects hereafter to engage in the practice of law in Tonopah.

### IS A HOT TOWN.

Calientes Said to Have a Population of 1,500 People.

Caliente is now one of the hottest little towns in the state, the thermometer 110 in the shade. Then everything is hurry and bustle and dust. A look around town shows a very cosmopolitan character. A sprinkling of Americans looking up business chances or investigating the contracts and making arrangements for supplies, and the boys from the ranches looking for team work. The Irishman in every kind of a position, from running a saloon to spading out a ditch.

The natives of southern Europe are here in force. Italians, Greeks, Austrians and Syrians all speaking their own jargons, and boarding themselves and saving their money. They evidently want to save their pile and go back, which is better for the country than to have them stay, for they are evidently too ignorant to make good citizens.

Around the headquarters of the various contractors it looks like circus day. Large tents for dining-room, store house and stables, smaller tents for bunks, etc., are being pitched; corrals and stock-yards built and for a distance of thirty miles these miniature tented cities are springing up for the accommodation of the industrial army.

A band of well diggers are among the pioneers. Equipped with the best machinery and tools their business is to dig wells at stated distances so that the graders and later on the engines may be supplied with water. There are now 1,500 persons in and about Calientes, most of them having arrived there within the past three weeks.—Delamar Lode.

### Mike Sullivan Returns.

Mike Sullivan, the well-known mining man, who was a partner in the Lynch-O'Meara lease during the leasing period, returned to Tonopah last week after several months' absence in the east and San Francisco. While in the latter place he watched the operations of the Tonopah stock exchange, and what he says of it is more emphatic than complimentary.
